CERTIFICATES

Software Testing: Preparation for Certification ISTQB Foundation, Stepik, Anton Kholin

Web technologies, Stepik, Dmitry Sergeev

Responsive Web Design course, Sololearn

SQL, Sololearn, Yeva Hyusyan

PHP course, Sololearn

jQuery Course, Sololearn

ABOUT

About 3 years experience in web development. I have several successfully launched products. Worked with companies from the Czech Republic and Austria. Total participation in the development of more than 15 projects, including 3 under my personal responsibility and 2 pet projects. I can do small projects on my own. I love such tasks as: layout of pages, development of components on Vue, code refactoring, development of animation and visual effects.

EDUCATION

• SSU them. Pitirim Sorokin

2014 - 2018

Bachelor's degree, "Applied Mathematics and Informatics", 2018

EXPIRIENCE

For the last year, I have been developing my projects with parallel main work not related to development. I studied nuxt, strengthened my knowledge in js, vue, trudged through courses, blogs and documentation

> Fullstack developer

Blackwood.cloud | NOW 2019- APR 2021

Website development company. Development to order in a set time, customer evaluation and other things that are found in such campaigns. Developed projects from scratch using scrum, was a full-stack developer, rose to a senior level in a year, was responsible for the projects themselves in general, approved the code for beginners, developed a site development plan and wrote a task in Trello

> Front-end developer

Platon Finance | JUL 2019- NOV 2019

Project work, unhurried website development without time limits in a large well-established team with planning, testing, reports and more. I worked as a junior, in parallel with the study of vue, I programmed in vue, then my code was reviewed and approved

> Back-end developer

SykGameLab | JUL 2018 - JUN 2019

A team of inexperienced student developers to enhance the overall experience of the whole team. Implementation of small projects in parallel with one "big project for the future", my task most often was to develop the back-end part and api, modules for the front and fix bugs.

НАВЫКИ

VUE

WEBPACK

NUXT

NODE.JS

ES6

GIT

SCSS

JQUERY

Expert in css/html. I know SOLID principles and OOP. I have experience in conducting code reviews. I have experience with bootstrap, figma, photoshop. I can send messages both via REST API and WebSockets. I have theoretical knowledge of DOM, PHP, LESS.
